How can I receive online payments?

Seazona supports integrating with **Fiserv/Clover**, **Elavon**, **PayPal**, **Stripe**, or we can add a unique payment link, so that you can receive online payments (credit card or e-check).

⭐⭐⭐⭐⭐

- Integrating with your **Fiserv/Clover** account:
  https://support.seazona.net/docs/IntegrateFiserv.pdf

⭐⭐⭐

- Integrating with your **Elavon** account:
  https://support.seazona.net/docs/IntegrateElavon.pdf

⭐⭐⭐

- Integrating with **PayPal** – **Checkout**:
  https://support.seazona.net/docs/IntegratePayPalCheckout.pdf

⭐⭐⭐

- Integrating with your **Stripe** account:
  https://support.seazona.net/docs/IntegrateStripe.pdf

⭐⭐

- Integrating Seazona with a payment link or HTML code:
  If your merchant vendor can provide you with a payment URL or HTML code, we can add that to your account so that your clients can make payments online. However, this means that you will need to manually add any payments received in Seazona. Whereas, with the above options, payments are automatically posted.
